SUMMARY

Product engineer who takes features from prototype to production across the stack, shipping production web from React and Next.js interfaces to Node/TypeScript and Python APIs and Postgres data models. At ChekOut AI, shipped AI-infused agent flows with citation checking, evals and an observability pipeline, instrumented analytics and tests, and worked directly with merchants. Delivered **23%** enrollment conversion (up from **10%**) across 8 shipped client applications and a **20%** sales lift for e-commerce clients.

EXPERIENCE

Product Engineer **Aug '24 — Present**
ChekOut AI New York City, NY

- Took the Shopify integration from prototype to production in FastAPI: OAuth with signed-state CSRF protection, embedded-app support and hardened scope handling. Extended the same foundation to Shopline.
- Built the merchant app front end (app.chekout.ai) in Next.js, React and TypeScript, wired to REST APIs: agent builder, dashboard and embeddable chat agent, with a **300 ms** debounced search over **~2,000 sessions** per merchant.
- Designed data models and API contracts across Python/FastAPI and Node/TypeScript services: Postgres schema, Alembic migrations, and an attribution layer feeding React views, with multi-tenant auth and no customer PII for security and privacy.
- Built AI-infused agent flows on Vertex AI with LangChain and retrieval, adding a trust layer of citation checking and evals on responses, and an SSE stream of onboarding progress for a multi-sided product serving merchants and shoppers.
- Instrumented analytics and logs (Cloud Logging, BigQuery, Looker Studio) with a daily Airflow background job on Cloud Composer, and raised reliability with Vitest, Playwright and Cypress suites, a test plan and CI lint/build gates.
- Deployed Docker-built Next.js and service containers to Cloud Run on GCP for live storefronts such as By Kind, holding release quality and reliability; worked directly with merchants, saving enrollment officers **3 hours** a day.

UX Design Intern **May '23 — Aug '23**
My Influency Atlanta, GA

- Redesigned information architecture and status tracking with Data Science teams, cutting task clicks by **28%** and saving **1 min 47 sec** per task.
- Designed a workflow-driven tracking platform that reached **95%** task success across 8 core tasks tested with 12 participants.

Interaction Designer **Oct '21 — Jul '22**
Arlene New York City, NY

- Built augmented reality web experiences in Three.js for Tapestry Inc. and Estée Lauder portfolios, driving **$75k/month** in additional revenue and a **20%** lift in in-store engagement at Macy's.
- Reduced animated mesh sizes to under 10MB working with engineers; the work was recognized by WindowsWear, Lenslist and Webby Awards.

EDUCATION

M.S. in Human-Computer Interaction, Georgia Institute of Technology **Aug '22 — May '24**
Atlanta, GA

B.A. in Interdisciplinary Digital Studies, Dartmouth College **Sep '17 — Jun '21**
Hanover, NH

SKILLS

Frontend React, Next.js, TypeScript, JavaScript, HTML/CSS, MUI, Vite

Backend Node.js, Python, FastAPI, SQL, PostgreSQL, SQLAlchemy, Alembic, REST API design, OAuth 2.0, Server-Sent Events

AI & Observability LLM features, retrieval (RAG), evals, citation checking, LangChain, Vertex AI, Cloud Logging, BigQuery, Looker Studio

Testing & Cloud Vitest, Testing Library, Playwright, Cypress, pytest, Git, GitHub, GitHub Actions, Google Cloud Platform, Cloud Run, Docker
